

Flatpad

Flatpad is a new developed panel repair system. The system works on air pressure with special produced pillows. The pillows are made out of special vulcanized rubber which is oil resistant, reinforced with Kevlar fibres.

Damages in hatches, doors or quarter panels can be removed by placing the pillows behind the damage and inflate it with the special air gun.

Technical specs:

- Pressure : 6bar max.
- Lifting height : - small 50 mm
- medium 85 mm
- large 110 mm

- Power : - small 500 kg / 6bar
- medium 1500 kg / 6bar
- large 2500 kg / 6bar

Content:

- Pillows: S - M - L
- Airgun with deflating valve and security valve of 6 bar.
- steel plate to push lines and edges
